Years

# Clamp meters

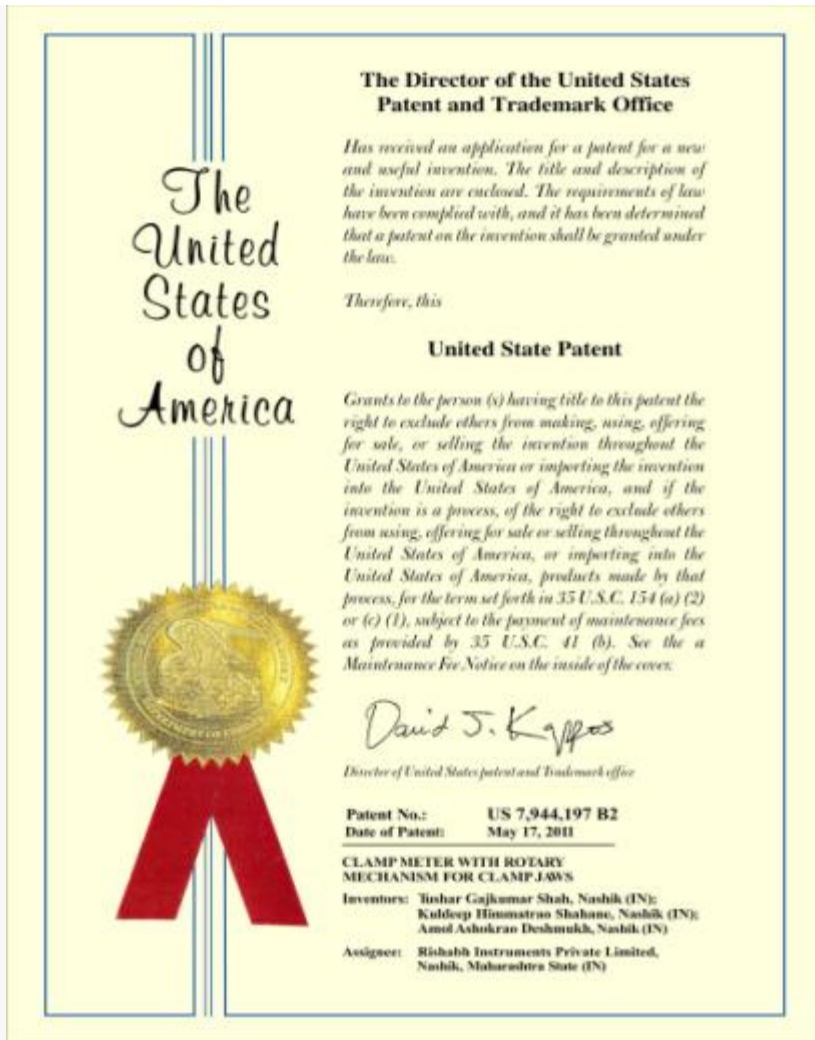

- Non rotating jaws
- Trigger at Side

- Rotating Jaws
- Trigger at back side

# US PATENT

## US Patent No. 7944197 B2 For Rotary Mechanism for Clamp Jaw

## US Patent No. 8,120,350 B2 Safe Trigger Mechanism of Digital Clamp Meter

# Clamp Meters

Delta Clamp 1000 A/300 A AC

Delta Clamp ES 1000A/400A AC

Delta Clamp 1000 A/300 A AC/DC

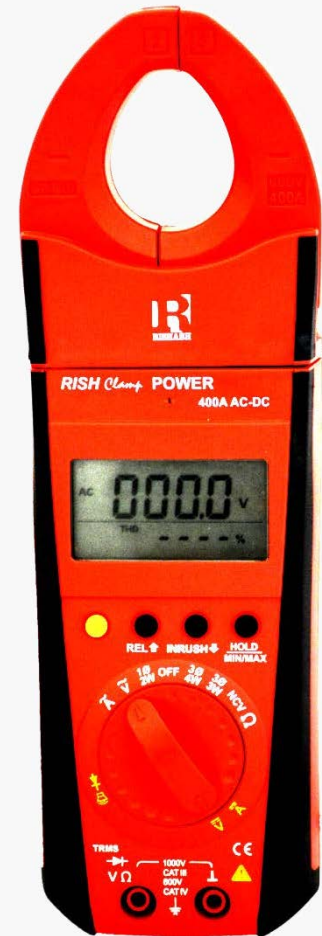

- Applicable for VFD applications
- Better Accuracy 0.5%
- 51mm Jaw size for 1000A & 41mm Jaw size for 300A
- CAT III 1000V/ CAT IV 600V
- IP 50

# Power Clamp Meter

- **Power Clamp meter** designed for Power Quality testing & maintenance applications with **CAT IV** compliance
- Available in two current ranges of **1000 A** and **400 A**
- Measures important power parameters like **kWh, Power Factor, Active-Reactive-Apparent Power & Harmonics**
- It also features **AC & DC Current, THD, Horse Power, Inrush, Peak** and **Three Phase (Balanced & Unbalanced) Power** measurement

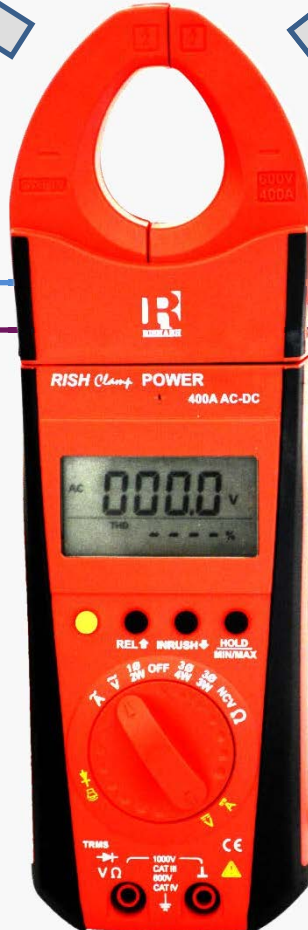

# What it does?

Energy Measurement

Inrush Current Measurement

Non Contact Voltage Detection

Power Measurement

# Benefits

Three Phase Power measurement

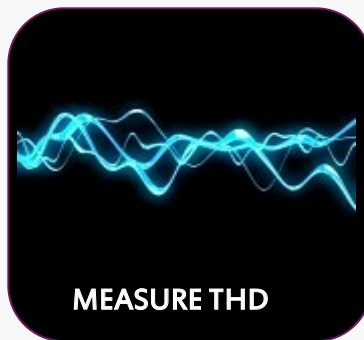

Auto-Calculation for Power measurement

Advanced Data Hold

provides dedicated function to measure inrush current for 100 msec

Total Harmonic Distortion upto 49<sup>th</sup> harmonic

Patented Rotating Jaw Design

'We offer a complete Maintenance tool kit for Test and Measurement'
