

2" Hoyt MT-110A Alternator Current Indicator

Features

This Alternator Current Indicator (100/0/100ADC), has ample capacity for testing starters on most 12 volt vehicle systems.

It is very easy and safe to use, just place the meter direct over the wire.
No direction connections are needed as it is using induction to take the measurement.

Special Dials are available with the following options:
Additional Colors, Scales, Special Legends, Logo and Mirrors.
