REACH Compliance

As a global supplier of electronic and electrical meters, Hoyt Electrical Instruments is fully committed to meeting established compliance dates established by REACH regulations. (The **R**egistration, **E**valuation and **A**uthorization of **C**hemicals Regulation, otherwise known as REACH, came into force on July 1, 2007)

Hoyt Electrical Instruments is primarily a supplier of articles which do not have any intentional release of chemical elements. We have not identified any of our products which would have required pre-registration under the legislation.

The European Chemical Agency publishes a candidate list of substances that are identified as Substances of Very High Concern (SVHCs), and the updated list is available at <https://echa.europa.eu/candidate-list-table>

We are aware of our obligations under the legislation and are working continually with our downstream suppliers to identify SVHCs that may be present in our raw materials. We are aware that the candidate list will change on a regular basis, and will be updating our compliance status as necessary.

Our determination is that our products do not contain any of the 240 Substances of Very High Concern, in a concentration above the 0.1% by weight allowable limit.
